OBJECTIVE

Senior Computer Engineering student at UIT experienced in GenAI/LLM integration, AI output validation, API/proxy integration, vector search, and edge AI deployment. Seeking **AI Engineering / AI Development internship** opportunities.

EDUCATION

University of Information Technology – VNU-HCM (UIT) 2023 – 2027 (expected)
Bachelor of Computer Engineering GPA: 7.69/10

SKILLS

AI / GenAI	Python, PyTorch, HuggingFace, PhoWhisper/Whisper, Gemini API, Ollama, prompt engineering
Backend / Data	FastAPI, REST APIs, JSON, OpenAI-compatible proxy, Qdrant, SQLite/MySQL, Docker, Git
Validation	pytest, API tests, edge-case analysis, AI output validation, stress/reliability checks
Edge / Systems	ONNX, MaixCAM (RISC-V), FFmpeg, CUDA, Linux
Methodology	Agile/Scrum, AI-assisted coding tools

PROJECTS

PhoWhisper Tool – GenAI Audio Transcription Assistant 2026
Python, PyTorch, HuggingFace, Gemini API, Ollama, FFmpeg, CUDA, Tkinter | GitHub

- **GenAI Workflow:** Designed a Vietnamese/multilingual audio assistant for local files, YouTube, and Google Drive, combining PhoWhisper/Whisper ASR with LLM refinement/Q&A to produce structured transcripts and study notes.
- **LLM Integration & Fallback:** Integrated Gemini SDK, OpenAI-compatible proxy, and local Ollama/Gemma pipeline with 3-attempt retries, proxy auto-start/health checks, cached availability checks, and shared GUI/CLI processing.
- **Performance & UX:** Optimized CUDA inference with `torch.inference_mode`, `torch.compile`, in-memory audio chunks, vectorized noise reduction, and RTF progress metrics; documented ∼75% faster startup, ∼50% faster long-file processing, and ∼40% lower peak RAM.

AIoT Flight Face Lookup – End-to-End AI Workflow System 2026
Python, FastAPI, Qdrant, ONNX, MaixCAM (RISC-V), Docker | GitHub

- **System Architecture:** Designed a 3-tier offline kiosk system (Web ↔ FastAPI Server ↔ MaixCAM Edge) for real-time flight info lookup, syncing 200 passenger profiles in $<$ 500ms via a 3-level tiered cache.
- **Model Training & Edge AI:** Trained MobileNetV2-based Landmark (CelebA 200K, Wing+Focal Loss) and ArcFace (CASIA-WebFace 500K) models, followed by INT8 ONNX quantization on the MaixCAM TPU to achieve 15.86ms end-to-end latency.
- **Reliability & Security:** Secured offline data syncing with a dual-cipher pipeline (AES-GCM 256-bit + XTEA-CTR) and maintained a low False Acceptance Rate (FAR = 0.22%).

ACHIEVEMENTS

3rd Place - IT Hackathon Solana Pragmatic 2025
Web3, Teamwork, Product Thinking, Rapid Prototyping

- **Contribution:** Built a Web3 gaming prototype that tokenised in-game assets as on-chain NFTs.
- **Knowledge Applied:** Used blockchain ownership models, transaction-flow design, and rapid prototyping.
- **Lessons Learned:** Balanced technical feasibility, product clarity, and delivery speed under a short deadline.

Top 36/100 Teams Nationwide - Google Hackathon Vietnam 2025
AI, Problem Framing, Data Reasoning, System Thinking

- **Contribution:** Developed an AI-based decision-support concept for real-time guidance under uncertainty.
- **Knowledge Applied:** Applied ML problem framing, data-driven reasoning, and system-level thinking.
- **Lessons Learned:** Turned ambiguous user needs into testable system behaviour.

EXTRA-CURRICULAR ACTIVITIES

Lead of Design and Media - WebDev Studios Club (UIT)
Team Leading, Communication, Collaboration, Content Planning

- **Contribution:** Coordinated information between club departments and translated internal plans into public media posts.
- **Knowledge Applied:** Applied cross-team communication, content planning, visual brief preparation, and posting schedule management.
- **Lessons Learned:** Learned to keep messages consistent across teams and deliver clear, timely communication to club members.

Member - Google Developer Student Club (UIT)
Event Planning, Communication, Collaboration, Community Learning

- **Contribution:** Participated in and co-organised technology workshops and seminars.
- **Knowledge Applied:** Applied event planning, public communication, and collaborative problem-solving.
- **Lessons Learned:** Learned how developer communities accelerate self-learning and project execution.
