OBJECTIVE

Final-year Computer Engineering student at UIT with hands-on experience in building full-stack applications (Java/Android, Python/FastAPI, Node.js), automated testing, API validation, and CI/CD pipelines. Proficient in Selenium, PyTest, Git, and defect tracking. Seeking **Automation Testing / QA internship** opportunities.

EDUCATION

University of Information Technology – VNU-HCM (UIT) 2023 – 2027 (expected)
Bachelor of Computer Engineering GPA: 7.69/10

SKILLS

Automation Testing	Selenium WebDriver, Page Object Model, PyTest, JUnit/TestNG concepts, Postman
Programming	Java, Python, JavaScript/Node.js, Shell Scripting
Tools & CI/CD	Git, GitHub Actions, Docker, Jira/GitHub Issues, Android Studio
Testing Concepts	Test Case Design, Functional & Regression Testing, Defect Lifecycle, Load/Stress Testing
Backend & DB	FastAPI, Express/Socket.IO, Firebase Firestore, SQLite, MySQL, Qdrant

PROJECTS

Zola Chat – Native Android Messaging Application 2024–2025
Java, MVVM, Firebase, Node.js/Express, Socket.IO, Cloudinary, Stream WebRTC | GitHub

- **Full-Stack Development:** Built a 100+ feature messaging app (text, media, stickers, polls, voice/video call, live location) with Java/Android client (MVVM + Repository), Node.js backend (REST API + Socket.IO), and Firebase/Cloudinary services.
- **Testing & Quality:** Designed and executed functional/regression test cases across 18 modules; validated WebSocket events, REST API endpoints, and Firebase auth flows using Postman; tracked 50+ defects through full lifecycle.
- **Build & Source Control:** Managed Gradle build flavors (local/production), Git branching, APK release builds; maintained test docs and deployment guides.

AIoT Flight Face Lookup – Edge AI Kiosk System 2025–2026
Python, FastAPI, Qdrant, ONNX, MaixCAM (RISC-V), Docker, PyTest | GitHub

- **System Architecture:** Designed a 3-tier offline kiosk (Web ↔ FastAPI Server ↔ MaixCAM Edge) for real-time passenger face lookup; synced 200 profiles in <500ms via tiered cache.
- **API & Integration Testing:** Wrote automated PyTest suites for REST API endpoints, vector search accuracy, crypto pipeline validation (AES-GCM + XTEA-CTR), and edge sync; stress tests verifying FAR = 0.22% and 15.86ms latency.
- **Edge Deployment & Debugging:** Automated device deployment scripts (paramiko SSH), ran hardware stress tests on MaixCAM, debugged camera freeze/sync issues via log analysis.

ACHIEVEMENTS

3rd Place – IT Hackathon Solana Pragmatic 2025
Web3, Product QA, System Testing, Teamwork

- Led QA and feature integration tests for a Web3 gaming prototype under a 48-hour deadline.

Top 36/100 Teams Nationwide – Google Hackathon Vietnam 2025
AI, System Thinking, Edge-case Analysis

- Conducted scenario testing and edge-case analysis for AI decision-support pipelines.
