OBJECTIVE

Computer Engineering student with hands-on experience in visual QA, design iteration and cross-functional collaboration. Seeking a **UI/UX / Product Design internship** to contribute to building intuitive SaaS and mobile interfaces while learning from a product-focused engineering team.

EDUCATION

University of Information Technology – VNU-HCM (UIT) 2023 – 2027 (Expected)
Bachelor of Computer Engineering GPA: 7.69/10 | 3rd Year

SKILLS

Design Tools	Figma, FigJam, Adobe Photoshop, Adobe Illustrator
Design Principles	Layout, typography, color theory, visual hierarchy, responsive design
UX Methodology	User flow, wireframe, prototype, design system, component design, auto layout, handoff, accessibility
Technical	C/C++, Python, HTML/CSS, JavaScript, PHP, Java, SQL

UI/UX DESIGN PROJECTS

Learn2Aid - First-Aid Learning Mobile App May 2025
Figma, FigJam, Mobile Design, Design System, User flow, Wireframe, Handoff | Behance

- Designed 10+ end-to-end mobile screens for a first-aid learning app, covering Login, Register, Dashboard, Lesson, Quiz, Checklist, and Result flows - streamlining how users learn emergency response skills.
- Architected a cohesive design system (components, typography, color tokens) and structured lesson + quiz flows that helped validate the Top 36/100 nationwide solution in Google Hackathon Vietnam 2025.
- Orchestrated smooth design-to-development handoffs by creating detailed specs and annotations, maintaining 95%+ implementation fidelity under tight Hackathon deadlines.

SSor AI - Surveillance System Admin Dashboard June 2026
Figma, Desktop App Design, Design System, Component Design, Handoff | Behance |

- Engineered a scalable admin dashboard for an AI surveillance system handling 3 user roles, streamlining the management of devices, users, sites, and monitored areas through intuitive user flows.
- Architected a robust design system and 50+ reusable UI components (data tables, status indicators, multi-tier navigation) in Figma, ensuring UI consistency and accelerating developer handoff.
- Designed the full page stack (Overview, Devices, Users, Sites, Areas, History, Settings) with role-specific permissions, reducing permission-related support tickets through clear state management.

Freelance - Client Portfolio Website Design March 2024
Figma, Web Design, Freelance Project, Client Collaboration, Responsive Design, Handoff | Behance |

- Designed and delivered a responsive portfolio website within a 2-week timeframe, translating client requirements into a functional and visually engaging interface.
- Iterated on design directions through direct client collaboration, implementing smooth page transitions and interactive hover states to enhance user engagement.
- Optimized adaptive layouts for mobile-first responsiveness, ensuring a seamless experience across all device breakpoints.

VISUAL DESIGN EXPERIENCE

Visual Design Portfolio Ongoing
Adobe Photoshop, Adobe Illustrator, Figma, Layout, Typography, Color Theory | Behance Portfolio |

- Published **15+ designs** (posters, social media graphics, photo edits, illustrations, banners) – each passed a 5-point QA checklist covering alignment, color consistency, artifacts, focal point, and export specs. Zero post-publish defects.
- Applied retouching, masking, cleanup workflows, and brand-consistent typography to deliver polished visual assets within single sessions.

Lead of Design and Media – *WebDev Studios Club (UIT)* 2024 – Present
Visual Communication, Content Planning, Team Collaboration | Fanpage |

- Coordinated visual communication strategies across club departments, translating internal plans into consistent public-facing media posts with 100% on-time delivery rate.
- Managed posting schedules and prepared visual briefs, ensuring brand consistency across digital channels.

RELEVANT EXPERIENCE

Zola Chat - Zalo Clone Android Application 2025
Java, Android Native (MVVM), Node.js, Firebase, UI/UX Design | GitHub | Video demo |

- Architected and implemented 20+ UI components following Material Design guidelines, creating intuitive navigation flows and consistent visual patterns.
- Conducted user testing sessions to identify pain points, subsequently iterating on interface designs to improve task completion rates.

ACHIEVEMENTS

3rd Place - IT Hackathon Solana Pragmatic 2025
Teamwork, Rapid Prototyping, Frontend Design & Dev

- **Contribution:** Designed and developed UI components for a Web3 gaming prototype that tokenised in-game assets as on-chain NFTs.
- **Knowledge Applied:** Applied frontend design and development skills, collaborated with teammates to implement blockchain ownership models and transaction flows under a tight deadline.
- **Lessons Learned:** Balanced technical feasibility, design clarity, and delivery speed while coordinating with cross-functional team members.

Top 36/100 Teams Nationwide - Google Hackathon Vietnam 2025
Team Collaboration, Fast-Paced Design, UX Research

- **Contribution:** Led frontend design and collaborated with developers to build a complete mobile app prototype for real-time AI-based decision support.
- **Knowledge Applied:** Applied UX research, design system creation, and iterative prototyping while coordinating across a multidisciplinary team.
- **Lessons Learned:** Turned ambiguous user needs into testable UI behaviour; learned to maintain design quality under intense time pressure.
